Fully Functional for 30 Days

Over 3500 resourced-constrained security pros rely on SolarWinds Log & Event Manager for powerful, affordable, and efficient security information and event management (SIEM). Our all-in-one SIEM combines log management, correlation, reporting, file integrity monitoring, and active response in a virtual appliance that's easy to deploy, manage, and use. We've designed our SIEM specifically for smaller security departments—providing the features you need without the complexity and cost of enterprise SIEM solutions.

Log & Event Manager at a Glance

- Collects, consolidates, and analyzes logs and events from security and security-relevant applications and devices
- Analyzes activity to identify attacks in real time
- Supports root cause analysis with built-in intelligence that applies to networks, applications, and security management
- Blocks and quarantines malicious and suspicious activity, including inappropriate USB usage
- Delivers deeper intelligence and broader compliance support through embedded File Integrity Monitoring (FIM)
- Produces compliance reports for HIPAA, PCI DSS, GPG 13, SOX, and more quickly and easily

Feature Highlights

Scalable and Easy Collection of Network Device, Machine, and Cloud Logs

Log & Event Manager collects and catalogs log and event data in real-time from anywhere data is generated within your IT infrastructure. Explore the supported data sources >>

Real-time, In-memory Event Correlation

By processing log data before it is written to the database, Log & Event Manager delivers true real-time log and event correlation, enabling you to immediately troubleshoot and investigate security breaches and other critical issues.

Advanced IT Search for Event Forensic Analysis

Log & Event Manager's advanced ad-hoc IT search capability makes it easy to discover issues using a drag-and-drop interface that tracks events instantly. You can even save common searches for easy future reference.

Log Data Compression and Retention

Log & Event Manager stores terabytes of log data at a high compression rate for compliance reporting, compiling, and off-loading—reducing external storage requirements.

Embedded, Real-Time File Integrity Monitoring

Embedded File Integrity Monitoring delivers broader compliance support and deeper security intelligence for insider threats, zero-day malware, and other advanced attacks.

Built-in Active Responses

Log & Event Manager enables you to immediately respond to security, operational, and policy-driven events using built-in active responses that take actions such as quarantining infected machines, blocking IP addresses, killing processes, and adjusting Active Directory® settings.

USB Defender

Log & Event Manager eliminates endpoint data loss and protects sensitive data with real-time notification of USB devices, the ability to automatically block their usage and built-in reporting to audit USB usage.

Out-of-the-Box Security and Compliance Reporting Templates

Log & Event Manager makes it easy to generate and schedule compliance reports quickly using over 300 audit-proven templates and a console that lets you customize reports for your organization's specific compliance needs.

Ease-of-Use and Deployment

Log & Event Manager is quick and simple to deploy. You can be up and auditing logs in no time using our virtual appliance deployment model, Web-based console, and intuitive interface.

"SolarWinds Log & Event Manager truly is an amazing tool with no limitations. I don't know of anything else on the market today that can match the quality of results Log & Event Manager delivers."

*- Ted Carmack, IS Manager,
Energy Federal Credit Union*

Who Should Use Log & Event Manager?

Resource-constrained security pros challenged with:

- Lack of visibility into attacks as well as limited time for staffed monitoring
- Compliance demands requiring automation and/or file integrity monitoring
- Inability to prioritize, manage, and respond to security incidents
- Slow incident response time
- Inability to determine the root cause of suspicious activity
- The need to monitor internal users for acceptable use and insider threats
- The need to share log and activity data across security, network, applications, and systems
- Inefficient, inoperable, or costly existing SIEM implementations

“SolarWinds Log & Event Manager truly is an amazing tool with no limitations. I don’t know of anything else on the market today that can match the quality of results Log & Event Manager delivers.”

*- Ted Carmack, IS Manager,
Energy Federal Credit Union*

How Log & Event Manager Supports Your Security Program

- Automation and embedded intelligence provide a Virtual Security Operations Center for 24x7 monitoring
- More intelligent and accurate detection of suspicious and malicious activity—including zero-day malware, insider, and advanced threats
- Eliminates time-intensive manual reporting processes
- Shortens time-to-respond duration through powerful forensics capabilities
- Automatically blocks abuse and misuse through active response for network, system, and access policy violations
- Monitors and blocks USB usage based on behavioral policy rules

System Requirements

HARDWARE	MINIMUM REQUIREMENTS
CPU	Dual processor, 3.0 GHz
Memory	8 GB RAM (minimum requirement)
Hard Drive	250 GB
SOFTWARE	MINIMUM REQUIREMENTS
OS/Virtual Environments	VMware® ESX®/ESXi™ 4.0 and above Hyper-V® Server 2008, 2008 R2, 2012, 2012 R2
Database	Integrated with virtual appliance

NOTE: The minimum server requirements listed assume default configuration. Significantly increasing the poll rate or statistic collection rate could result in additional load on the server, which may require a larger CPU or additional memory.

Try Before You Buy. Download a Free Trial!

Don't just take our word for it. At SolarWinds, we believe you should try our software before you buy. That's why we offer free trials that deliver full product functionality. Simply download Log & Event Manager, and you will be up and analyzing your log files in less than an hour. It's just that simple! Download your free, fully-functional trial today!
