

Get nearly double the hard drive capacity on select GigaStor systems.
Order before June 30, 2010.

For a limited time, order a select GigaStor appliance from Network Instruments and receive a free storage upgrade.

Order the GigaStor 12 TB ... receive 16 TB of storage
Order the GigaStor 16 TB ... receive 32 TB of storage
Order the GigaStor 32 TB ... receive 64 TB of storage
Order the GigaStor 48 TB ... receive 96 TB of storage

The GigaStor is a high-performance network forensics appliance capable of historical analysis as well as solving complex network and application problems.

GigaStor Advantages

- Records everything traversing the wire
- Captures at line rate with exclusive Gen2™ capture technology
- Time-based navigation helps to quickly isolate issues
- Localized processing and decoding minimizes network overhead
- Easy-to-deploy rack mountable unit
- Seamless integration with the Observer architecture
- Quickly solve network, VoIP, and other elusive problems

The GigaStor is applicable for managing full-duplex gigabit and 10 GB, WAN, and SAN environments.

The StorMore promotion expires June 30, 2010.
Act now to qualify for your free automatic capacity upgrade.
